

5. Strategies for taking action:

- Raise awareness of universal values, such as justice
- Focus on hopeful visions for the future, positive examples, success stories and role models
- Facilitate interaction and connection
- Identify and highlight possible ways to take action
- Engage with the various "pillars of society"
- Host themed days, such as Mother's Day and Women's Day, and connect them to local and current issues
- Specifically, you can participate in actions such as petitions, demonstrations, social media campaigns, cooperate with organisations and engage with politicians

This brochure was created and designed by the work group „Frauen*Stärken für Klima-Gerechtigkeit“

Empowering Women* for Climate Justice

**Gender equality is one of the
most important driving
forces for sustainable
transformations**

designed by freepik

1. The current role of women*:

- Women* are most affected and threatened by the climate crisis, economically and in terms of health
- But, more men hold important decision-making positions and play a crucial role in contributing to the climate crisis (“petromasculinity”)

2. How women* can make an impact:

BECOME BOLDER, LOUDER, MORE VISIBLE

- Dare to take on positions of greater responsibility in society instead of remaining in the second row or keeping yourself small
- Build networks to become politically and socially effective together
- Commit to more sustainable and gender-equitable economy and urban development
- Vote for democratic parties and choose organizations that fight for equality and sustainability
- In everyday life, make decisions that are as sustainable and environmentally friendly as possible, regarding nutrition, consumption and mobility

designed by freepik

designed by freepik

3. How can we empower women*:

- Better education and greater financial security
- Greater appreciation and fairer distribution of care work
- Ensure that women*'s safety and needs are reflected and integrated into work, technology, urban planning, mobility and medicine
- Effectively prevent and fight sexism, violence and harassment
- Equal access to leadership positions in business and politics, actively contributing and bringing women*'s perspectives and equality issues to the table
- Conversation and protest where injustice and exploitation take place
- Mobilize men and encourage them to actively take part in supporting these goals

4. The kind of paradigm shift we need:

- Move away from patriarchy, competition, and exploitation
- Strive towards the common good, cooperation, and care
- Foster a “Culture of Care”
- Compassion, justice and respect for the dignity of all people lead to solidarity, togetherness and safety and security for all
- Solidarity-based (rather than exploitative) ways of living and producing
